

FOR IMMEDIATE RELEASE

TCR Industries Appointed Exclusive West Coast Distributor for Cimbar Resources, Inc.

LA PALMA, Calif. – February 16, 2026 – TCR Industries is pleased to announce a new partnership with **Cimbar Resources, Inc.**, a leading global producer of specialty mineral products. Under this agreement, TCR Industries will serve as the exclusive distributor for Cimbar's extensive mineral offerings across the **Western and Southwestern United States**.

This strategic collaboration combines Cimbar's century-plus experience in mineral production with TCR Industries' strong distribution network and technical expertise in the **CASE (Coatings, Adhesives, Sealants, and Elastomers)**, plastics, and rubber markets.

"We are thrilled to add Cimbar's product lines to our portfolio of high-quality additives," said **Troy Wickershiem**, VP for the industrial market at TCR Industries. "This partnership allows us to provide our West Coast customers with access to a broader range of high-performance mineral solutions backed by Cimbar's reputation for quality and reliability, aligning perfectly with our commitment to delivering innovative solutions."

The partnership enhances the availability of Cimbar's core mineral solutions, including **barium sulfate, calcium carbonate, and alumina trihydrate**, ensuring that manufacturers in the region receive consistent, high-value materials tailored to their specific performance needs.

About TCR Industries: TCR Industries is a premier distributor of specialty chemicals and minerals, serving the coatings, adhesives, sealants, elastomers, plastics, and personal care industries. With a strong presence across the Western and Southwestern United States, TCR is committed to connecting world-class suppliers with customers and providing superior service and technical expertise.

About Cimbar Resources, Inc.: Cimbar Resources, Inc. provides performance-driven mineral additive solutions for industrial, automotive, and consumer applications worldwide. With deep expertise in inorganic materials, the company engineers mineral-based products that improve performance, appearance, processing efficiency, and functionality across a wide range of end uses. Cimbar's portfolio includes barium sulfate, calcium carbonate, alumina trihydrate, and recycled mineral fillers.
